

INFINITY

TEXTILE WALLCOVERING, WOOD VENEER AND FAUX SUEDE ON NON-WOVEN BACKING & NON-WOVEN TEXTILE WALLCOVERING

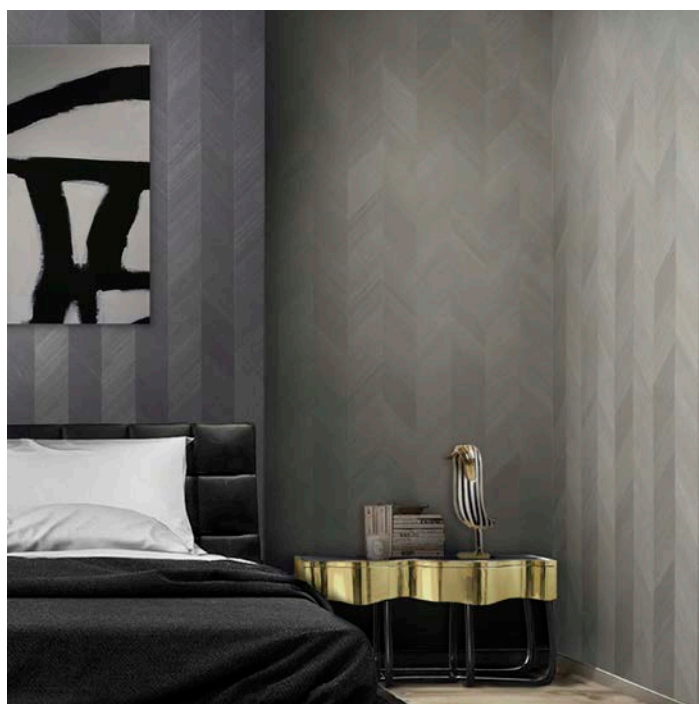

Discrete, elegant and timeless, yet versatile and ever-surprising... stripes offer infinite possibilities to dress up your walls. With a design as simple as a stripe, Omexco's new collection *Infinity* invites you to discover how refreshing a new interpretation of a very familiar design can be.

Wood veneer, faux suède, natural linen, space dyed and printed rayon yarns, printed and embossed non-woven... a great variety of exquisite materials compete with each other in endless colour variations of small and large stripe designs, tone-on-tone or multicoloured...

For most items, railroad installation is possible, with a more contemporary look and stunning horizontal stripes as a result, as well as the more traditional vertical installation, for a classic effect, making your room look more spacy.

On the rythm of these vibrant stripes, colours switch from pearl grey and ivory to luxurious gold, platinum and rosé champagne. Soft cream and jade pastel shades alternate with cool turquoise, sapphire and violet, and warmer colours like copper, leather brown, camel, paulownia wood, theatre red.

All references are supplied by cut length, no minimum order (width: between 90 cm and 130 cm), and all of them have a non-woven backing for an easy installation. They have a good light resistance and an ecological certificate is available for all items. The linen yarns, the rayon yarns and the non-woven textile wallcoverings have a European fire rating B S1 D0. Thanks to the marine certificate, rayon yarns and non-woven wallcoverings can be used on cruise ships.

More information and samples are available on request.
